Easikit™ Swan Neck

Purchase ✔

The Swan Neck conveyor is available in three widths: 600mm, 900mm and 1200mm. It is normally used where there is a height restriction underneath a machine such as a shredder, handling pre-shredded recyclable materials. This is a modular design which is ideal where space is limited to convey materials within a closed loop and is easily customisable to suit individual site requirements.

Belt width options

The Swan Neck conveyor is available as 600mm, 900mm and 1200mm

SPECIFICATIONS			
Power supply	415V	Belt width	600mm, 900mm and 1200mm
