Easikit Flatbed Conveyor Specification Document

The Flatbed Conveyor is available in four widths – 600, 900, 1200 and 1500mm wide – and is predominantly used for dry materials handling in the recycling industry. This very robust conveyor is great for baler infeed or picking line conveyors and is easily customizable to suit individual site requirements.

Features:

- Fully enclosed conveyor design – all moving parts guarded.
- 100mm-600mm high side guides for material containment
- Built with modular sections that can be interchanged to adjust conveyor lengths.
- Durable folded mild steel sections forming parallel box side members with cross bracing, hot dip galvanised.
- All parts and frames are standard Coveya designs and 'off the shelf'

Benefits:

- Flexibility to be loaded by hand or existing conveyor
- Standard sections can be tailored to give you a completely customized solution
- Almost every aspect of the EK Flatbed design can be specified to meet your individual business needs
- All components and wear parts are stocked at Coveya Ltd factory in Bristol

Big on Strength – Big on Flexibility:

- A complete fixed conveyor system design based upon a modular design concept.
- Interchangeable standard sections that can be tailored to give you a completely customized solution.
- Almost every aspect of the EK Flat Bed design can be specified to meet your business needs.

- Low-maintenance design to minimise downtime
- All wear parts stocked at Coveya Ltd factory
- Robust and durable design
